

# X-TREME<sup>®</sup> CONCRETE TAPE

---

Tex-Trude X-TREME Concrete Tape is composed of 20 mil thick strong self-adhering rubber based adhesive that has a high tack for a bond to concrete. Designed to seal the X-TREME Vapor Barrier to concrete. It is also used to seal seams, penetrations, small repairs, and patch areas.

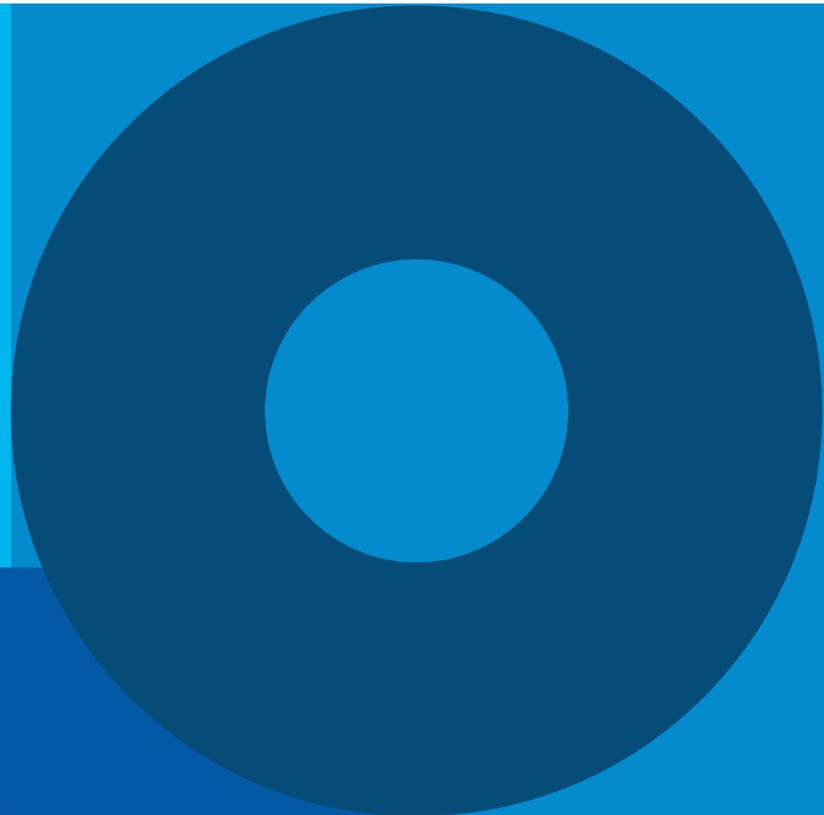

## INSTALLATION ›

---

Prior to installation, perform a visual inspection that all dust, dirt, debris, has been removed from the concrete and X-TREME Vapor Barrier to achieve maximum adhesion. Apply the X-TREME Concrete Tape to the concrete and the X-TREME Vapor Barrier. Allow the tape to remain in place, while the adhesive wets out into the concrete. The temperature will affect how quickly the adhesive wets into the concrete. If you need to move the X-TREME Concrete Tape do so immediately. The X-TREME Concrete Tape will form a very strong bond with the concrete that will be difficult to remove.

**Warm conditions:** Store out of direct sunlight. Perform normal installation, using industry knowledge of the guidelines for vapor barriers.

**Cold conditions:** In cold weather applications, it is suggested to condition the tape 8 hours in a warm environment prior to use. This will help the tape reach its optimal performance.
